Education

Techno Main Salt Lake **Sep. 2023 – May 2027**
B.Tech in Computer Science & Engineering | 79% *Kolkata, West Bengal*

Experience

Qbayes **Feb. 2026 – Mar. 2026**
Full Stack Developer Intern *Remote*

- Architected a production-grade multi-tenant ERP backend for a bakery chain with strict data isolation across companies, locations, and shops using Node.js, Express, PostgreSQL, and Prisma ORM.
- Implemented hierarchical RBAC across 5 roles with role-scoped Prisma queries — enforced at the service layer, not just routes — and JWT auth with HttpOnly cookies, refresh token rotation, and multi-device session management.
- Built stock lifecycle management (inbound → distribution → sales → expiry returns), atomic Prisma transactions for every multi-step operation, and node-cron jobs for automated expiry alerts at 7, 3, and 0 days.

Freelance **2026**
Frontend Developer *Remote*

- Built and deployed a production landing page for Aston Glass (glass manufacturer) — responsive, performance-optimized, and aligned with client branding.

Projects

Credex Audit — AI Spend Diagnostic Tool | *Next.js, Express, Supabase, Groq, Zod* | Live **2026**

- Built a diagnostic tool that flags redundant AI subscriptions and recommends tier downgrades; shipped a decoupled Express API (custom rate-limiting, HPP protection) instead of Next.js API routes for clean process control.
- Pivoted the AI provider from Hugging Face to Groq (`llama-3.1-8b-instant`) after cold-start latency exceeded 20s, cutting response time to under 2s with no cold starts.
- Achieved Lighthouse scores of 96 Performance, 95 Accessibility, 100 Best Practices, 100 SEO; implemented fire-and-forget lead capture (Supabase + Resend) so DB/email latency never blocks the user-facing response.

Signalist — Stock Market Platform | *Next.js, MongoDB, Inngest, Finnhub, TradingView* | Live **2025**

- Built a full-stack stock analysis platform with real-time market data, interactive TradingView charts, and watchlist-driven portfolio tracking via Finnhub API integration.
- Developed secure Next.js API routes with BetterAuth token-based authentication and rate limiting; engineered Inngest-powered background workflows for daily personalized market digest emails.

Open Source Contributions

strapi/strapi | PR #26421 — Merged **Feb. 2026**

- Guarded a repeatable-field `.map()` crash on relations in the content-manager package.

emscripten-core/emscripten | PR #26639 **Feb. 2026**

- Allowed overriding `-jsD` directives from the command line.

emscripten-core/emscripten | PR #26318 — Merged **Feb. 2026**

- Fixed a missing `$webSockets` dependency in `emscripten_websocket_new`; added a regression test reviewed and approved by core maintainers kripken and sbc100.

CollaboraOnline/online | PR #14444 — Merged **2026**

- Rewrote `create-l10n-all-js.pl` in Python for the localization build pipeline.

marketcalls/openalgo | PR #898 — Merged **Feb. 2026**

- Added precise type hints to trading API helper functions in `restx_api/ticker.py`, improving type safety and IDE tooling.

nextcloud/server | PR #58370 — Merged **2026**

- Removed a redundant `ext-json` Composer requirement, since JSON is bundled with PHP 8+.

Technical Skills

Languages: C/C++, Python, JavaScript, TypeScript
Frameworks & Libraries: React.js, Next.js, Node.js, Express, TailwindCSS, LangChain
Databases: MongoDB, PostgreSQL
Tools & Platforms: Git & GitHub, Prisma, Inngest, Zod, Supabase
Problem Solving: 100+ problems solved on LeetCode

Achievements

Xplore — Career Counselling Platform | SIH 2024 (College-Level), 2nd Place **2024**

- Built for the SIH problem statement on career counselling in schools — a full-stack platform (web, mobile, ML) that recommends careers via a test-driven ML model and surfaces free learning resources.

Techno Geeks Hack 1.0 (2024) — Built a working prototype under a 24-hour constraint.
